

Climate Change Training

Advanced Module Corporate Engagement & Active Climate Stewardship

Investors have a unique opportunity to use their relationships and influence in the companies and assets in their portfolios to reduce the climate risk to their beneficiaries and across the economy.

Learning Objectives:

- Deepen knowledge of active ownership, different types and examples of engagement on climate risk,
- Better understand the climate engagement in different Asian markets and the types of engagement themes investors could focus on,
- Learn about the corporate engagement tools and resources available for investors.

Target audience:

- Stewardship professionals, Investment analysts

Duration:

- 60 minutes

Pre-requisites

- Knowledge of climate change science, global commitments, financial impacts, regulatory risks, TCFD framework and reporting, and integration of climate risks and opportunities in investment strategies
